

Add Books to μ Vision2 Project Window – Books Tab

The contents of the μ Vision2 **Project** window – **Books** tab is configurable with the dialog Project – File Extensions, Books and Environment. This dialog allows you to add books to the Device Data Books section. You may copy the PDF files from the CD ROM to the hard disk and adjust the pathnames. In this way you need no longer the CD ROM to review data books.

Sample Add Books dialog settings

TIP

*You may add all relevant documents to the books page. In this way you can quickly access all information that belongs to your current project in the μ Vision2 **Project** window – **Books** tab.*
